

4. Students and training programs:

The enrollment of students in training programs related to their scientific specializations or professional skills is a strong indicator of the success of education, as students' achievements vary in developing technical skills to enhance leadership, problem-solving and decision-making abilities, as these training programs play in building learning bridges and promoting academic and professional excellence.

Reviews	Date	Specialization	Student Name	Program Name
<p>Working in the project to support digital transformation and IT governance in the Digital Transformation Agency in the Municipality of Madinah, 'I started working next to my studies in the project to support digital transformation and IT governance in the Digital Transformation Agency in the Municipality of Madinah Region.- The duration of the project is 18 months (22-01-2023 to 22-06-2024).- Contractor: Renad Al-Majd Company (RMG) for technology consultancy.</p> <p>The project aims: 1- Applying the ITEL 4 Framework for Technical Services Management.2- Applying the Dev-UPS methodology in software development.3- Activating the business continuity and risk management system in compliance with ISO 22301 standards and provisions in business continuity.4- Raising the level of satisfaction of internal and external beneficiaries in the Secretariat about the technical services provided.</p> <p>The role is represented as a graduate software engineer along with the consultants and the project team: 1- Participate in the design of policies and procedures for the application of the DEV-UPS methodology.2- Participate in the design of the operational business model for the DEV-OPS.3- Participate in the design of the organizational structure of the matrix of roles and responsibilities between organizational units</p>	22/1/2023	Software Engineering	Jihad Rashid Alf	Digital Transoformation & Governance
